

Tech Case Management System

Are you looking for a cost effective, easy to use and completely integrated justice solution for your courts? If the answer is yes, then TechCMS, a comprehensive Case Management Software developed by Houston based TechSoft, Inc, is the solution that you are looking for.

TechCMS improves administration of courts by automating all the functions from case initiation to case disposition while sharing the data with other departments. TechCMS is a proven Case Management System that is developed incorporating many ideas and suggestions from the judges and clerks over the years. TechCMS is currently running in over 100 courts in the State of Texas.

For the past 5 years TechSoft, Inc. has evolved into an established and pioneering software development and IT consulting company. Our goal is to build and deliver a successful software solution by understanding your needs and tailoring IT solutions that meet your requirements.

Features of TechCMS:

- Complete integrated solution (Courts, Law Enforcement, and Jail)
- Fast and simple access to data
- Easy to use and user friendly screens
- Complete Case management features including Accounting, Events, Calendar, etc. with user customizable codes and fields
- Meets National and Texas Judicial Committee Standards
Warrant Module
- Complete accounting and reports
- Partial and Multi Case payment processing
- Automated new court costs and fee updates
- User access security and audit trail
- Built-in collection processing
- Document generation using user defined templates
- Over 100 custom reports
- Electronic state mandated reporting (OCA, DPS, etc.)
- OmniBase interface for DPS's FTA Program
- Data migration from legacy systems
- Rapid Implementation and on-site user training
- Cost effective and affordable even for small and medium size counties and cities
- Toll free phone plus remote access online technical support

Other TechSoft, Inc. solutions include:

TechLERMS - Law Enforcement Record Management System

TechJMS - Jail Management System

TechTicketWriter - Laptop/Handheld Ticket Writer System

TechMobile - Remote Data Entry System

TechUDS - Utility Data System (Water, Sewage, Electric, etc.)

The image displays three overlapping screenshots of the TechCMS 4.1 software interface. The top-left window, titled 'TechCMS 4.1 - [Case Filing]', shows a form for entering case details. The top-right window, titled 'TechCMS 4.1 - [Search Case]', displays a search criteria form and a table of search results. The bottom window, titled 'TechCMS 4.1 - [Financials]', shows a detailed financial summary for a specific case.
