Tech Ticket Writer System

Are you looking for an easy to use and cost effective Ticket Writing System for mobile laptops? If the answer is yes, then TechTicketWriter, a complete Ticket Writing System developed by Houston based Technology Consultants, Inc. is the solution. TechTicketWriter provides a complete automated ticket writing solution that enables officers to issue tickets quickly while maintaining the accuracy using a Laptop computer.

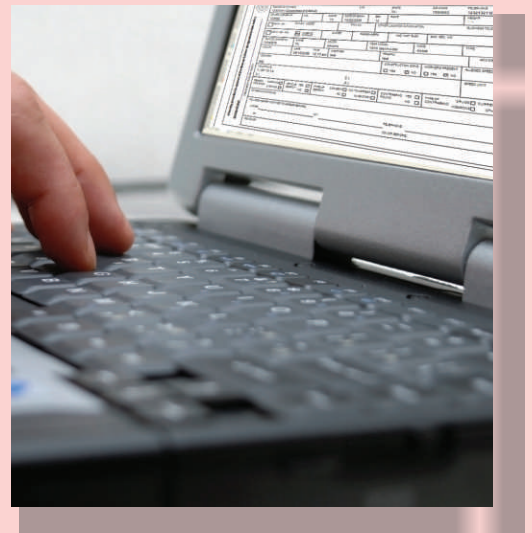

Technology Consultants, Inc. provides TechTicketWriter software, printer, magnetic reader card and mobile laptops for police cars (if needed). Defendant information can be automatically entered by scanning the driver's license using the magnetic card reader. Type-ahead functionality that completes words as you type or drop-down menus and check boxes makes data entry fast and easy in most of the fields. Easy data synchronization and open architecture system design allows TechTicketWriter to interface with Technology Consultants, Inc.'s TechCMS (Court Case Management System) or any existing court system.

For the past 10 years Technology Consultants, Inc. has evolved into an established and pioneering software development and IT consulting company. Our goal is to build and deliver a successful software solution by understanding your needs and tailoring IT solutions that meet your requirements.
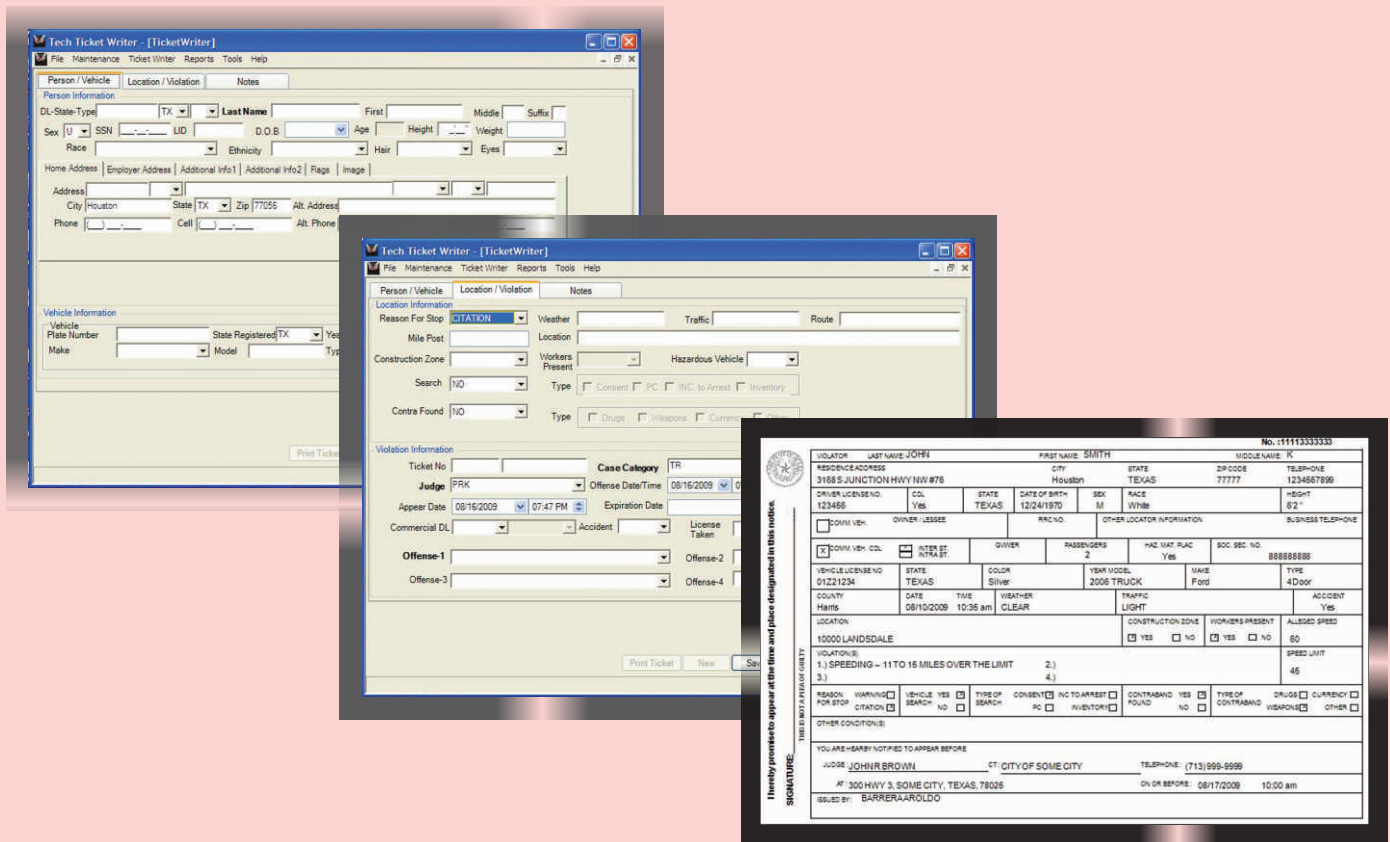

Features of TechTicketWriter:

- Easy to use data entry screens
- Automated defendant data entry from DL using magnetic card reader
- Quick list of offense codes that are commonly used
- Type-ahead functionality that can complete the words as you type
- Configurable drop-down menus and check boxes
- Allows input of racial profiling data
- Complete court data on the local mobile
